3

BATHROOM:

3

SLEEPS:

6

Mando, the 2020 Lagoon 46 feels less like a "boat" and more like a floating holiday home – one that is able to sail in comfort. It has the "Owner's Version" layout with the extended Master Cabin.

This Lagoon 46 has benefited from an extensive US\$190,000 solar panel and battery upgrade, enabling a far more independent and comfortable onboard lifestyle. The system is designed to support air-conditioning for the master cabin overnight and during the day without the need to run the generator—delivering a noticeably quieter, more peaceful anchoring and marina experience.

The cockpit provides big dining table and seating, with direct connection into the saloon. Forward at the bow, a second cockpit with sunpads and sofa that become your "front garden" at anchor – quiet coffee at sunrise, happy hour at sunset, kids or friends lounging in the breeze with no one else around.

Inside, the saloon is bright, open and social. The galley-up layout allows close interaction between chef and guests, with panoramic views and everything within easy reach. The three cabins are generous in size.

At the helm, the Lagoon 46 is deliberately stress-free. Self-tacking jib, good visibility, and all the lines led back to the flybridge make short-handed sailing realistic and practical.

The twin Yanmar engines give you a 7–8 knot cruise without the sail. Mando is a safe and comfortable mover that will reliably carry your friends and family across the water.
